

Krim

Sovereign Safe Superintelligence Infrastructure

The governed runtime where every AI action is validated before execution.

hello@krim.ai

krim.ai

Why Current AI Fails in Regulated Operations

You need AI that works. But today's AI architectures weren't built for your compliance requirements.

- **AI hallucinations create regulatory exposure**

Foundation models generate plausible but incorrect outputs. In regulated operations, a single wrong action can trigger violations, complaints, and financial losses.

- **Compliance is checked after the fact, not before**

Current AI safety approaches catch errors after generation. Post-hoc detection misses 20-40% of novel errors. You discover the problem after the damage is done.

- **40+ disconnected tools, no unified view**

Your teams jump between siloed systems. Data doesn't flow. No single source of truth. Institutional knowledge lives in people's heads, not your systems.

- **Policy changes take months to roll out**

When regulations change, updating your workflows takes weeks of development, testing, and deployment. Meanwhile, you're exposed.

One Platform. Every Workflow. Full Control.

KrimOS validates every AI action before execution. Not after. Your rules. Your data. Your control.

Automate Operations

- 20+ pre-built Autonomous Workers
- Voice, email, SMS, chat, document workflows
- Account processing compressed from weeks to days
- Customers handled 24/7 while humans focus on complex cases
- No transfers, no callbacks: complete context every time

Enforce Compliance

- Every action validated against your policies before execution
- 26 pre-execution validators ensure reasoning is sound
- Regulation changes deploy instantly in plain language
- Complete audit trail: every decision logged automatically
- Data isolation: sensitive information never leaks across roles

Control at Scale

- Real-time dashboards across all operations
- Instant override: intervene on any workflow live
- Role-based access: each user sees only what they should
- 8 purpose-built command centers for different functions
- Scale oversight without scaling headcount

KrimOS: Five Products. One Stack.

Atomic. Composable. Governed. Every layer works together to give you safe autonomy at scale.

05 KUPA Command Centers

Real-time dashboards. Instant overrides. Full operational control across all channels.

04 KULA Digital Twins

Query your entire operation in plain English. Surface insights. Deploy changes in minutes.

03 KARTA Autonomous Workers

20+ multi-modal specialists for contact center and back-office. Monitored and controllable.

02 KENDRA Intelligence Runtime

The core: validates every AI action against your policies before execution. Zero hallucinations.

01 KRIYA Execution Primitives

Atomic governed actions. Policies, checks, templates, data scoping. Change once, enforce everywhere.

Built for Your Entire Leadership Team

Chief Risk Officer

"Show me portfolio segments with deteriorating patterns"

Risk concentration analysis, early warning alerts, intervention strategies with compliance validation

Chief Operating Officer

"Reduce operational costs while maintaining service quality"

Channel optimization, agent productivity insights, workflow efficiency recommendations

Head of Operations

"Optimize our approach for high-priority case segments"

Performance analysis, A/B test recommendations, deployment-ready campaign variations

Compliance Officer

"Ensure all outbound activity follows state-specific rules"

Policy engine updates, real-time violation monitoring, automatic compliance validation

Finance Director

"Project impact of extending resolution timelines for at-risk acc..."

Historical pattern analysis, segment-specific projections, cash flow impact modeling

Operations Analyst

"Automate our monthly compliance reporting for the board"

Automated report configuration, exception flagging, audit-ready documentation

From Hours to Minutes. From Reactive to Proactive.

Without KrimOS

- Wait 3 days for analyst reports
- Email chains to gather cross-system data
- Weeks to test and deploy strategy changes
- React to problems after portfolio impact
- Compliance checked after the fact
- 40+ disconnected tools, no single view
- Policy changes take months to roll out
- Agent turnover erases institutional knowledge

With KrimOS

- Get any operational insight instantly
- Query across all systems in natural language
- Test and deploy changes in minutes
- Proactively prevent issues before impact
- Every action validated before execution
- One platform, one governed runtime
- Regulation changes deploy in plain English
- Knowledge encoded in Digital Twins, never lost

20+ Pre-Built Specialists. Deploy in Weeks.

Multi-modal workers across voice, email, SMS, chat, and document workflows. Monitored. Controllable.

Contact Center

Channels: Voice | Email | SMS | Web Chat | Social | Document | Multimedia

Pre-Execution Validation. Not Post-Hoc Filtering.

Kendra sits between foundation models and your operations. Every action is validated before it executes.

Traditional AI Deployment

- Models connect directly to production systems
- Outputs execute without validation
- Errors discovered after impact
- Safety bolted on as an afterthought

Kendra-Powered

- Runtime layer validates every AI decision
- Policy enforcement before execution
- Failures prevented, not just detected
- Safety built into the architecture

Three Layers of Protection

Architecture Layer

Typed action primitives, formal policy constraints, capability boundaries

Execution Layer

Pre-execution validation, dynamic policy injection, rollback mechanisms

Observability Layer

Every decision flows through validation gates, complete audit trail

FOR BANKING

KrimOS for Banking & Financial Services

Credit decisions to collections. Every workflow. At scale. With built-in regulatory compliance.

Compliance Automation

Real-time checks against FDCPA, TCPA, CFPB, FCRA, SCRA. Violations caught before they happen. Every decision logged for regulators. Regulation changes deploy instantly.

Unified Operations

Replace 40+ disconnected tools with one platform. Real-time approvals with full audit trails. Multi-channel outreach with rule enforcement and override capability.

Autonomous Workforce

Autonomous Workers handle calls, emails, documents across channels. Observable and auditable. Live visibility into workflows. Override any decision with full audit.

Deployment Options

Managed SaaS (99.99% SLA) | Dedicated VPC in your AWS/GCP | On-premise Kubernetes

Enterprise encryption | SOC2 | HSM key management | Immutable audit logs | Zero downtime deployment

FOR GOVERNMENT

KrimOS for Government Operations

Citizen services, regulatory enforcement, inter-agency coordination. With sovereign control.

Citizen Services

Benefits, passports, license renewals approved same-day. Unified eligibility and enrollment across SNAP, Medicaid, housing.

Regulatory Enforcement

Environmental, safety, and tax compliance with complete audit trails. Transparent AI decisions citizens trust.

Inter-Agency Coordination

Single citizen view across all agencies and program levels. Vendor evaluation, contracts, payments with oversight.

Compliance & Security

Real-time FedRAMP, FISMA, NIST 800-53 tracking. Built-in controls. Every component maps to required frameworks.

Sovereign Control

GovCloud | On-Premise | FedRAMP-authorized managed cloud | Full data sovereignty

GETTING STARTED

From Demo to Production

Expert project management and technical support throughout deployment.

01

Discovery

We map your use cases, walk through the relevant product stack, and assess fit.

02

Pilot

Start with a focused workflow. Connect to your existing systems via APIs or secure feeds.

03

Expand

Add workflows, channels, and Autonomous Workers as the scope grows.

04

Scale

Full production. 24/7 operations. Continuous learning improves every interaction.

Who Should Join the Demo

One business owner (operations/collections) + One technology owner (systems/integrations) + Risk or compliance lead

Schedule Your Demo

Walk through how Autonomous Workers, Digital Twins, and Command Centers
scale your operations while maintaining compliance.
